

# CREATING A SINGLE STRATEGIC VIEW

## HOW DOES Gov-PATH WORK?

The Gov-PATH Solution delivers time-saving insights for federal financial and program managers; adapting to your existing business processes. Gov-PATH records institutional knowledge, bridging staff transitions and system migrations, to provide leadership with historical activity and future plans in one location.

### **P** PROGRAM MANAGEMENT

Gov-PATH organizes program areas and distributes appropriated funds to projects, including contracts, grants, agency transfers, salaries and operations. Responsible program managers oversee staff assigned to the projects under their work group and monitor spending plans across fiscal years.

### **a** ACCOUNTING & BUDGETING

Gov-PATH supports best practices in budget and financial management. Budget authorization and appropriation codes are connected to fund accounts and object class codes to produce an integrated chart of accounts. Gov-PATH increases the accuracy of budget figures, reconciles accounting records to audited financial systems, ensures consistency across reports, and reduces reporting time frames.

### **T** TIME MANAGEMENT

Gov-PATH takes future project award deadlines and plan backwards to the start date. Staff and managers utilize automated notifications and milestone tracking tools to stay on schedule. Gov-PATH records changes to funding deadlines, and automatically updates project schedules, budget plans, acquisition and grant forecasts, as well as management tracking systems. This integrated approach saves time.

### **H** HUMAN CAPITAL

Gov-PATH becomes a member of your team, providing standard processes for new staff and defining roles and responsibilities to make changes and approve actions. Individuals and teams collaborate and utilize project management tools to track progress, store documents, analyze data and share results.

## Gov-PATH HELPS YOUR ORGANIZATION BE MORE

### ➤ Strategic

Gov-PATH creates a single strategic view of agency business process activity. Management can see planned project funding, pending actions, deadlines and responsible managers in the context of the fiscal and calendar-year schedule. Limitations to available funds, such as continuing resolutions, are addressed by adjusting program spending plans to match revised funding totals and allocation schedules.

### ➤ Coordinated

Gov-PATH uses Smart Data that is accurate and timely for staff as they complete each of their respective steps in the business process. Urgent emails and last-minute requests for information are reduced or eliminated, as managers have access to complete, up-to-date information in Gov-PATH.

### ➤ Efficient

Gov-PATH integrates data across other systems, records actions taken and steps completed to track progress towards completion. The single unified agency business process provided by Gov-PATH reduces time spent comparing spreadsheets, correcting data errors, asking for status updates, and making up for missed deadlines.

### ➤ Impactful

Gov-PATH focuses staff on applying their area of expertise directly to their piece of the mission, communicating and coordinating to meet the expectations of leadership and management.

# PUT YOUR ORGANIZATION ON THE RIGHT PATH WITH A SINGLE STRATEGIC VIEW.

Gov  
PATH

# START BY TURNING BIG DATA INTO SMART DATA.

Gov-PATH delivers value throughout the organization; integrating data, facilitating communication, saving staff time and delivering insights within and across federal agency functions. Gov-PATH adapts to an agency's business process instead of requiring changes to it.

Gov-PATH connects Program Management and Financial Management throughout the federal business process to create a single strategic view. Gov-PATH is the singular system used agency-wide by managers and staff for accurate, accessible and actionable strategic information to plan, budget, track progress, evaluate performance and make decisions.

Gov-PATH aligns limited resources—time and human capital—to accomplish Budget Formulation, Budget Execution and Post Award tracking of federal funds. As a result, your agency is prepared to meet legislative and executive requirements, including the DATA Act, to demonstrate the impact of every program dollar from the time it is authorized and awarded until it is fully expended.

Meets compliance and reporting requirements from a single data source

## 1 ORGANIZE & VERIFY ACCURATE DATA

Gov-PATH organizes program narratives, performance measurement data and financial spending plans to satisfy the **Budget Formulation** process.

- Aggregates program funding to the appropriation, fund account and object class level.
- Organizes program funding into projects, including contracts, grants, agency transfers, salaries and operations.
- Reconciles data across other agency systems to verify an accurate and consistent match with authorized funding totals.
- Automates "data sheet" process by populating prior year spending and projected funding needs.
- Populates financial tables in budget documents and financial reports.
- Provides accurate projections to acquisition forecasts, grant funding announcements and other management plans.

## 3 EXECUTE WITH ACTIONABLE DATA

Gov-PATH manages **Post Award Tracking** of projects; recording related spending and program results until work is completed and awarded funds are fully expended.

- Process invoices against project tasks and fund accounts simultaneously (% spent).
- Approve progress reports and deliverables within periods of performance (% time complete).
- Record deliverables and end products of value (document storage).
- Report performance measures and manage data collection efforts (cloud-based storage).

## 2 INTEGRATE & MAKE DATA ACCESSIBLE

Gov-PATH integrates agency spending plans with project funding actions to meet award deadlines and complete the current fiscal year **Budget Execution** process. Gov-PATH replaces agency "cuff records" and ensures total awards remain within authorized funding totals.

- **START ON TIME.** Project action start dates are calculated based upon the type of award action and level of effort required—program, acquisition, grant and budget staff work together to make funds available on a predictable schedule.
- **AVOID SCHEDULE SLIPS.** Project approval steps are assigned milestone targets and responsible people—program and budget staff work together to achieve timely management approval for funding awards.
- **FINISH ON TIME.** Managers and leadership work with staff using dashboards, pending action lists and email alerts to view upcoming deadlines and resolve past due action items—ensuring funds are awarded by the end of the fiscal year.

## ACHIEVE POSITIVE RESULTS

- DATA Act Readiness
- Data Transparency
- Internal Controls
- Funds Control
- Risk Mitigation & Program Integrity
- Program Performance Measurement
- Comprehensive Single-source Reporting
- Cloud-based Document & Data Storage

"Gov-PATH is the type of custom solution I wish I had while working for the federal government. I needed help managing our data, programs needed help making sense of our financial requirements, and management would have benefited from the analytic tools and reporting capabilities."
